Avant-garde design

Creating one's own vision of decoration.
Breaking with existing forms and shapes.
Searching and finding what is innovative and unique.

That is what we specialise in
and what we make a reality.

The combination of aesthetic values
and practical features gives a spectacular effect
in the form of Mardom Decor's strips.

**DECORATIVE
ELEMENTS**

Mardom Decor's mouldings are manufactured entirely in Poland. Caring about the highest quality of our products, we have to be sure about accuracy and precision with which all decorative elements are made. This is only guaranteed by domestic production lines which we use to develop a system for creation of each design. Mardom Decor's manufacturing plant meets strict requirements

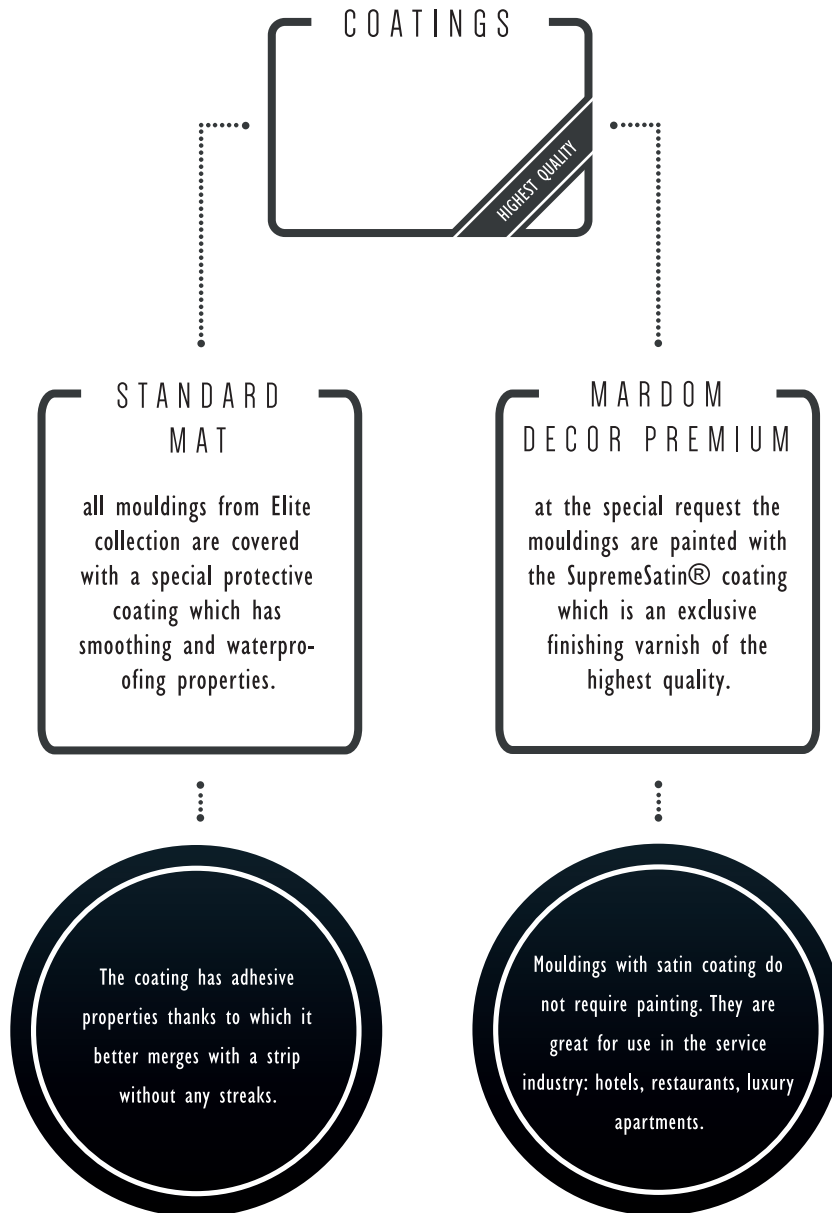

concerning safety and environmental impact. Raw materials used by us do not contain any hazardous ingredients and are in line with the European Regulation EC 1907/2006 (REACH). Mardom Decor's Quality Department supervises correct course of all stages of production, eliminating products with any manufacturing defects.

Mardom Decor collections

division by the used material

Mardom Decor Premium

At the special request of our customers mouldings from the Elite collection are painted with the SupremeSatin® coating which is an exclusive finishing varnish of the highest quality. The effect obtained through the use of the varnish gives the products an immaculate appearance, which has a great effect on the entire interior arrangement. The biggest advantage of the SupremeSatin® coating is the elegance of the mouldings which impress

with their satin depth, snow white color and perfect smoothness. It's easy to remove any contamination from the surface of the coating and the composition of the product will fully satisfy the supporters of eco-friendly solutions. The model form of the mouldings allows for direct installation, with no additional coatings or protective measures. Genuine luxury is now within your reach.

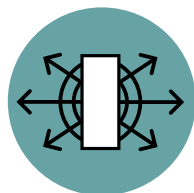

WATERPROOF PRODUCT

which can be installed in rooms with higher humidity, including but not limited to, bathrooms and kitchens.

PRODUCT MADE FROM ECOLOGICAL POLYFORCE®

Caring about ecology and the environment, we have made sure that the material used to manufacture our strips is recyclable.

ALTERNATIVE TO SWELLING MOULDINGS MADE OUT OF MDF

MDF mouldings, in contrast to Mardom Decor's products made from Polyforce®, are prone to easy deformation, delamination and swelling under the influence of moisture.

PRODUCT DEDICATED TO MODULEO® VINYL FLOORS

High-end design of the mouldings perfectly matches stylish vinyl floors. Both products, thanks to water resistance and increased resistance to mechanical damage, are used together in renovations of service buildings.

IDEAL PRODUCT FOR HOTELS, RESTAURANTS, BANQUET ROOMS, LUXURY APARTMENTS, ETC.

Thanks to model form of the mouldings, it is possible to install them straight away without the need to paint them beforehand. This considerably speeds up the whole renovation process.

EASY TO INSTALL PRODUCT

The mouldings are installed using installation adhesives Mardom Decor FIX PRO and Mardom Decor FIX EXTRA. Detailed instructions concerning installation can be found on Mardom Decor's YouTube channel.

Mardom Decor Atelier is a response to the individual needs of our customers for whom we develop original and innovative designs. We offer the possibility of creation of unparalleled products with a unique design and color palette, which stand out from the standard offer. We are flexibly adapting to the vision and expect-

tations of the consumers. We assist in the implementation of innovative projects and participate in the process of creation of unique patterns and shades of the mouldings. Mardom Decor Atelier - stuccowork tailored to your needs!

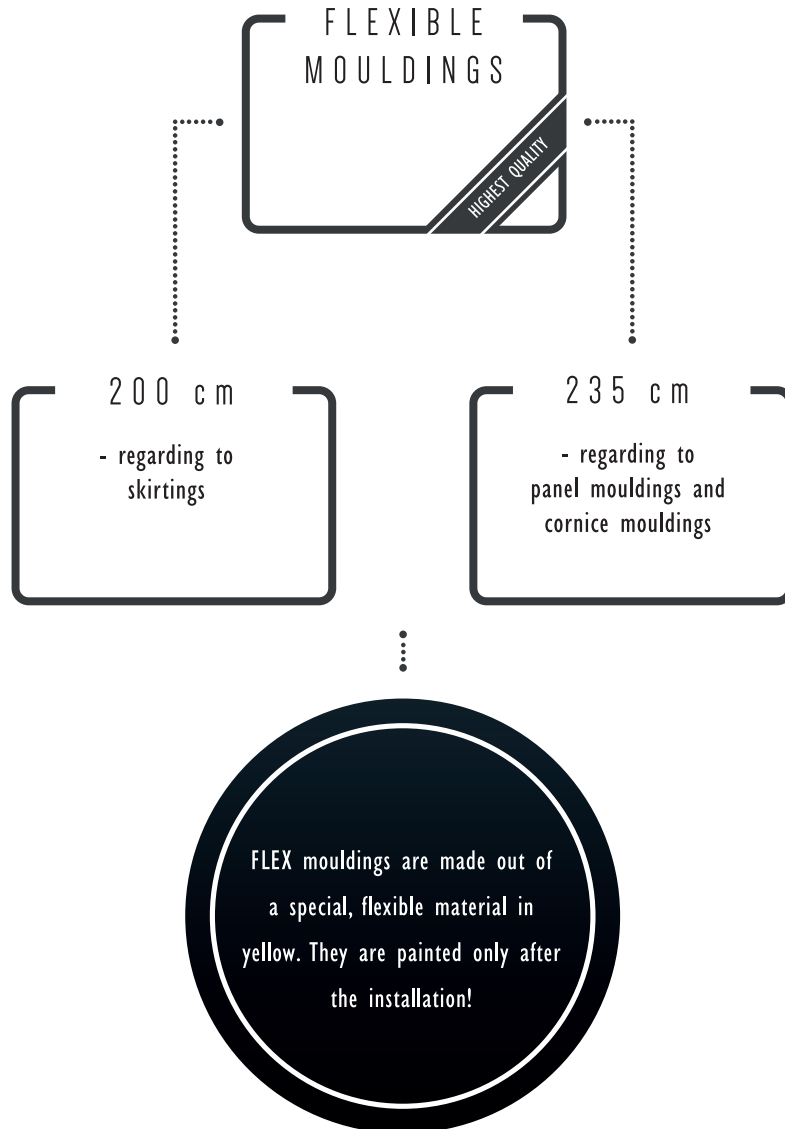

The mouldings can be painted any colour available in the RAL colour chart. This option is available when ordering at least 300 metres of product.

There is an option to have any shape of mouldings manufactured according to an individual order of the customer. Minimum order volume — to be agreed.

Flexible mouldings

marked with „F”

Lighting moulding

dedicated to be used with LED lighting

As part of additional service, Mardom Decor's mouldings can be covered with aluminium tape which prevents light from passing through them (marked as "R" – reflective – in the price list).

All lighting mouldings are made of POLYFORCE® - belong to Elite collection

Adhesives

adhesives dedicated to installation of internal mouldings

300 ml

FIX PRO

Installation adhesive. It is used to fix the mouldings to surfaces (including but not limited to mineral plasters, gypsum-carton boards, wood, concrete)

FIX EXTRA

Flexible adhesive to bond joints between the mouldings. Apart from adhesive properties, it also serves a sealing function between the elements.

300 ml

Accessories

accessories dedicated for use during installation of mouldings

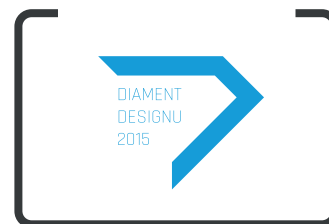

MITER BOX

miter box for cutting mouldings at an angle of 45° or 90°. Made of highgrade material

ALUMINIUM TAPE

aluminium tape is used to cover lighting mouldings from the inside. It prevents LED light from passing through.

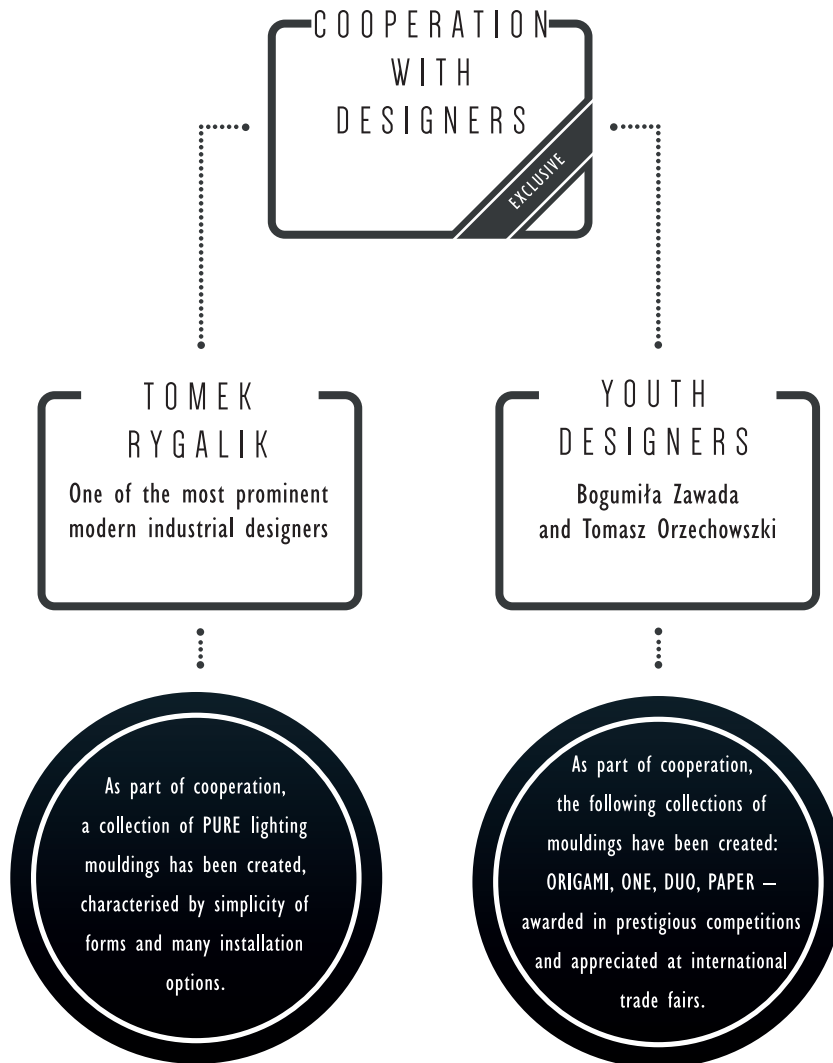

“Design Oscar” for the QL002 lighting moulding. The product has been awarded for original design, high usability and quality.

Award given to the QA001 moulding from the Origami collection by consumers and readers of Dobrze Mieszkaj magazine and www.dobrzemieszkaj.pl portal.

Award given to the QA001 moulding in the category of market potential. The jury appreciated the design and innovativeness of the project, predicting high demand for decorative profiles.
